Item #102017 30 chewable tablets Retail: \$12.95 Preferred Customer: \$ 9.95

Why should you give your dog a nutritional supplement?

Most of us take supplements and eat right to get all the nutrients necessary to avoid disease and ensure good health. The same is true for the four-legged member of your family ... your precious pup.

Your dog needs a high quality nutritional supplement daily because all dogs have different nutritional requirements. Age, activity level, environment, genetics, breed and other factors determine your dog's special needs. Although a good premium food will provide a solid foundation, food alone cannot supply all the nutrients necessary to fulfill those unique requirements. For example, Huskies often require more zinc than other breed types.

A deficiency of just one or more nutrients can leave your dog vulnerable to disease.

Why should you give your dog Advanced Daily Supplement with Phytonutrient Power?

We believe HealthyPetNet™ Advanced Daily Supplement with Phytonutrient Power is so superior that it will set the standard for canine nutritional supplementation.

This cutting-edge formula approaches canine nutrition in several unique and effective ways by providing:

- A broad spectrum of vitamins, minerals and plant or phytonutrients. Nutritionists generally agree that nutrients from whole plants contain a full array of biologically active compounds that work together to enhance each other. That's why we combined plant or phytonutrients with other nutrients in this supplement.
- An array of proteins, which are needed for the growth and maintenance of all body tissues.
- Antioxidants derived from plants and other nutrients, including Ester-C.
- N-acetylcysteine, an important antioxidant found the in the liver.
- Beta-sitosterol, which is derived from the fiber of plants. Medical studies have associated a reduced risk of many health problems with a diet high in fruits and vegetables and have concluded that many of the benefits are due to plant sterols. Plant sterols are present in the fibers of every plant. Advanced Daily Supplement contains beta-sitosterol (a plant sterol) and other phytonutrients.
- Barley grass, which contains health supporting enzymes and chlorophyl.

Advanced Daily Supplement for Dogs with Phytonutrient Power

Ingredients:

Liver Meal, Dicalcium Phosphate, Sucrose, Calcium Ascorbate, Stearic Acid, Safflower Oil, Corn Starch, Potassium Chloride, Magnesium Silicate, Beta-Sitosterol, Barley Grass, N-acetylcysteine, Niacinamide, Hydrolyzed Vegetable Protein, a-tocopheryl Acetate, Iron Oxide, Magnesium Stearate, Vitamin A Acetate, Zinc Oxide, Riboflavin, Thiamine Mononitrate, Manganese Sulfate, Vitamin D3 Supplement, Copper Sulfate Monohydrate, Pyridoxine Hydrochloride, Potassium Iodide, Vitamin B12 Supplement.

Guaranteed Analysis			
Crude Protein	23% (Min)	Crude Fiber	4% (Max)
